Every Transaction; Every Decision; Every Day
Collaborative Solutions - Accelerated

• Government and industry bringing people and information together to reduce decision times and accelerate innovation and the acquisition process

• Develop acquisitions strategies that enable open, secure, adaptable collaborative solutions to user requirements

• Partnering to deliver on-time, on-budget implementation for AF Business Systems
Recapturing acquisition excellence requires an experienced, skilled, empowered, and accountable workforce, and begins with proper requirements and adequate and stable funding.

• Revitalize the Air Force Acquisition Workforce

• Improve Requirements Generation Process

• Instill Budget and Financial Discipline

• Improve Air Force Major Systems Source Selections

• Establish Clear Lines of Authority and Accountability within Acquisition Organizations
4 Mar 2009, President Barack Obama supported bipartisan legislation to reform the defense acquisition process

- He rejected the “false choice” of deciding between national security and wasting billions of taxpayer dollars.

- Cut $40 billion in wasteful spending each year

- Developing “tough new guidelines” on contracting by the end of September.
• Increased complexity and scope requires more attention to:
  – Federal Acquisition Processes
  – Federal Acquisition Work Force
  – Stakeholders’ Role at Every Level of the Acquisition System

• Acquisition Reform Bill
• Among the reforms in their proposed Weapons Systems Acquisition Reform Act, one would require the Pentagon to conduct preliminary design reviews before giving approval to new acquisition programs.

• Cut $40 billion in wasteful spending each year
Challenges

• Challenges facing the 754 ELSG
  – > 45% O&M budget cuts (FY 2006 – 2009)
    – Continuing pressure for personnel reductions
    – Managing a geographically separated workforce
    – Maintaining credibility with our customer
